

Math 724, Fall 2017
Clarifications and Corrections to Bogart's Text

p.30, Supplementary Problem #1: Interpret “list” as ordered list. In other words, $4 = 2 + 1 + 1$ is *not* considered to be the same composition as $4 = 1 + 1 + 2$.

p.100, top line: “number real number” should be “real number”

p.104, problem 228: A_3 should be C .

p.105, bottom paragraph: “If is also” should be “It is also”

p.107, problem 237: For the purpose of the problem, assume that every couple includes one man and one woman. No political opinion is intended thereby.
